

GPS L1/L3 Ceramic Diplexer

The **4DCR4C-1227.6/1575.4/90-L** is a custom GPS ceramic diplexer designed for high-volume production that provides low-loss and solid channel isolation in a convenient compact surface mount package. This product is one of ComNav's many GPS diplexer products that combine high-performance, competitive price, and small size. This part can be supplied for commercial and military applications.
