

GPS Glonass L2 Ceramic Bandpass Filter

Model 3BCR4C-1235/Z100-L is an innovative, pole-zero Ceramic Bandpass Filter in a compact surface mount package. This Glonass device features tight control over the passband and zero placement in order to achieve a high-performance customized response. This is yet another example of ComNav's flexibility in ceramic designs to meet the ever changing needs of our customers.
